The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by McGonigle (4,574,174).

In regard to claim 1, McGonigle discloses providing a carrier tray (12) for each meal, introducing the meal into each tray and subjecting the meal to conditions that inhibit microorganism growth and contamination (e.g., freezing), the meal consisting of one or more foods that are introduced into the tray at desired positions, freezing the meal to a temperature that enables the meal to be cold stored, providing a serving dish (34) for each tray wherein the serving dish is of a size and shape that corresponds substantially to the tray and manipulating the tray in such a way that the frozen meal is transferred into the dish such that one or more foods are located in the same relative position as in the tray. That is, the two foods are separated from each other and are oriented ^{from} ~~from~~ a side wall toward the center. This is all claim 1 is seen to positively recite. In regard to claim 2, McGonigle teaches the tray can be a flexible plastic (col. 3, line 55 plus and col. 3, lines 18 plus and col. 4, lines 9 plus).
